# SMART MOTORWAYS – CHALLENGES AND REQUIREMENTS

## ELEMENTS

Motorway Infrastructure

Vehicles

Traffic Incidents

## CHALLENGES

Manpower Shortages

Speeding Vehicles

Traffic Congestion

## REQUIREMENTS

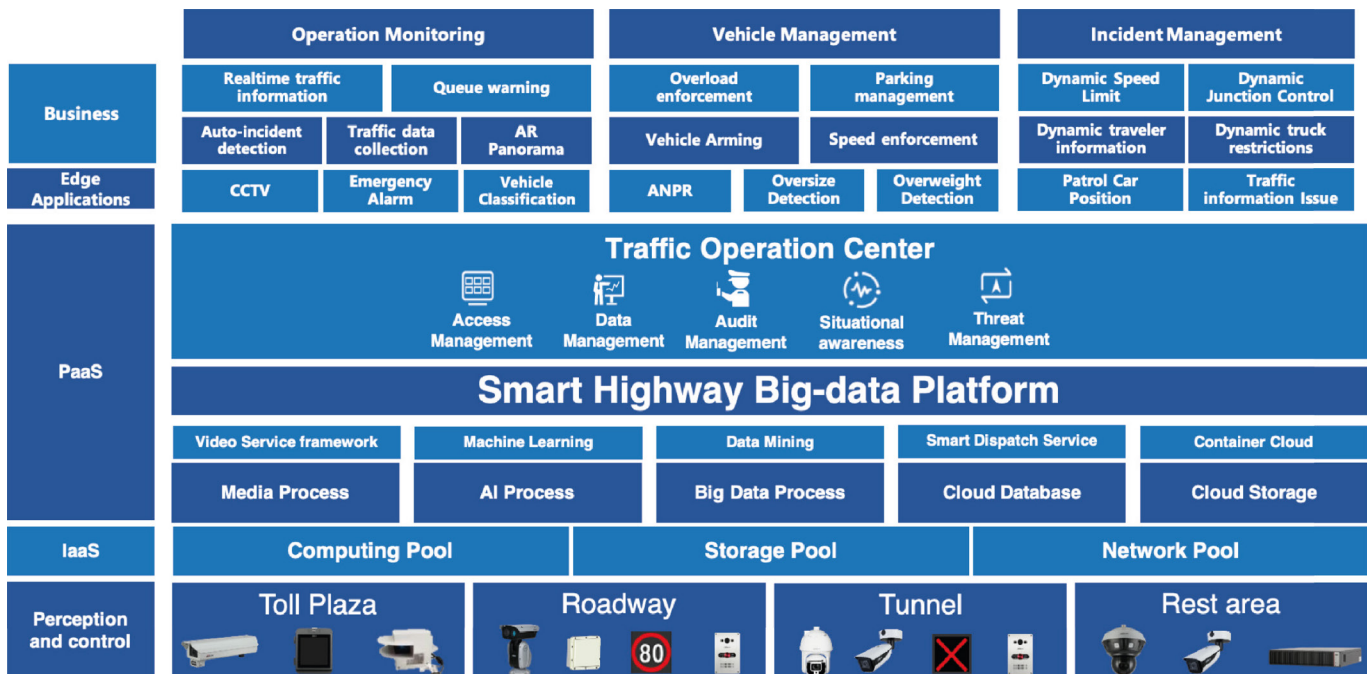

Operational Monitoring

Vehicle Management

Incident Management

# SOLUTION OVERVIEW

**Tunnel**

- ATID
- Information issues
- Traffic data collection

**Toll Roads**

- ANPR
- Vehicle classification

**Platform**

**Roadway/Bridge**

- ATID
- Speed enforcement
- Information issues
- Traffic data collection

**Rest Areas**

- AR Panorama
- Parking management

**Operational Monitoring**

How to quickly know the status of the motorway network?  
How to automatically detect incidents and send alarms?

**Vehicle Management**

How to manage vehicles on the motorway?  
How to obtain evidence for traffic violations

**Incident Management**

How to avoid incidents?  
How to respond quickly to traffic incidents?  
How to manage traffic when an incident occurs?

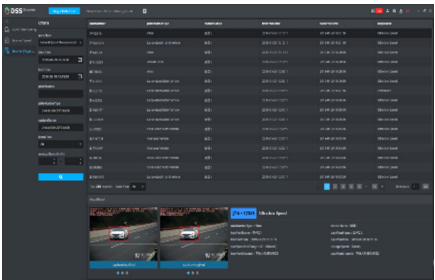

# SOLUTION INTRODUCTION

## VEHICLE MANAGEMENT

### Solution

#### Speeding Management

#### Vehicle Management

#### Helmet Detection

#### Speeding

#### Vehicle Information

- Vehicle make
- Vehicle speed
- Vehicle colour
- Number plate

### Benefits

#### Vehicle Information Collection:

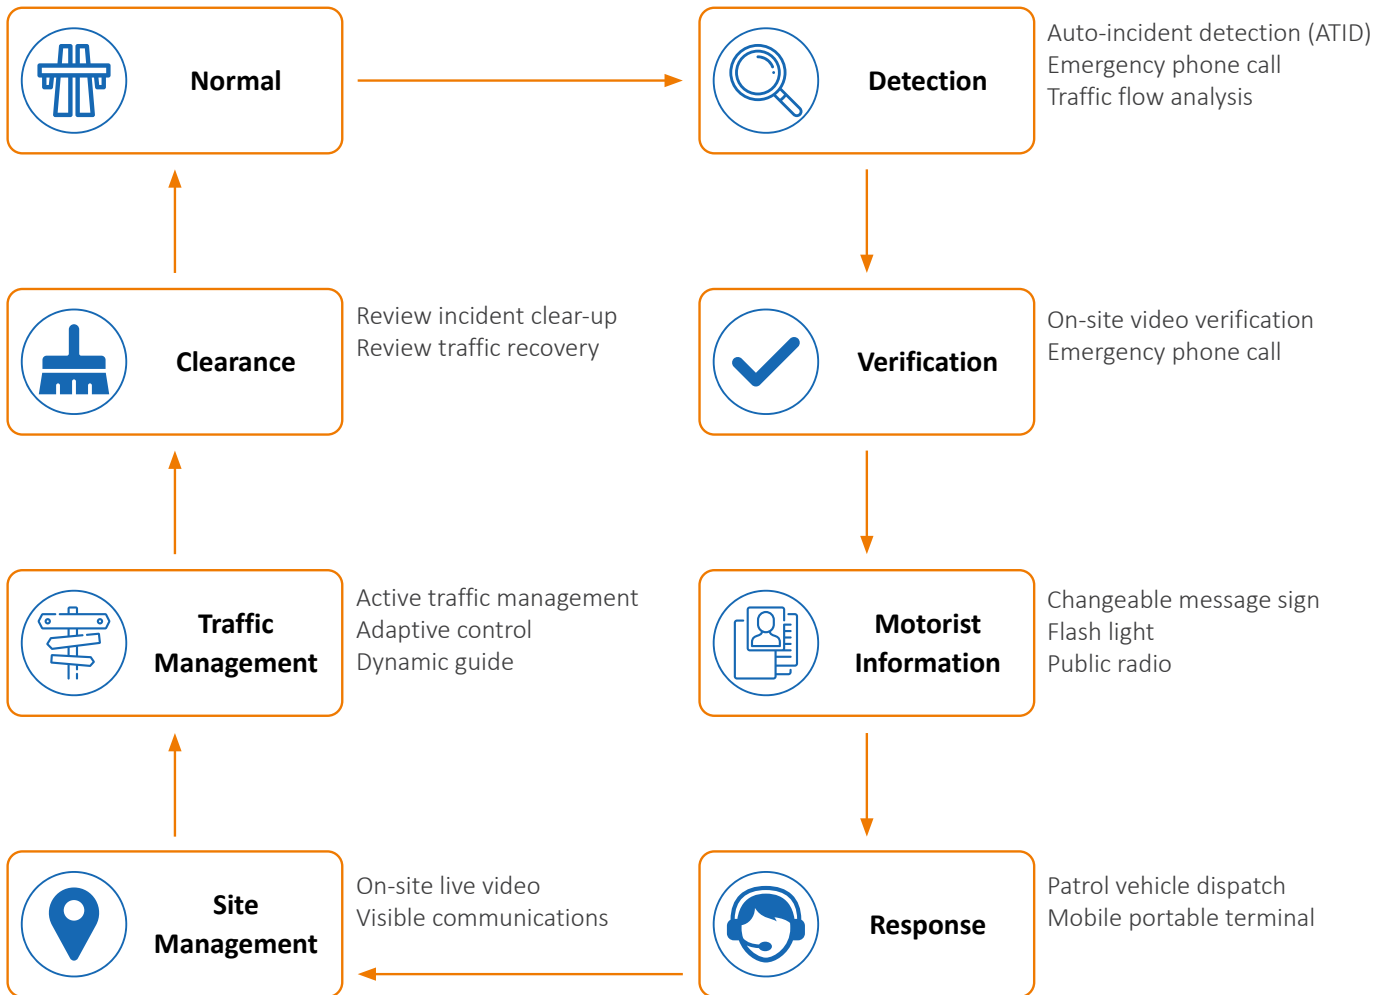

Number plate, type, speed, colour and helmet detection etc. This information could be used for revenue analysis and administrative enforcement.

#### Vehicle Speeding Enforcement:

Portable/fixed speed detection, average speed detection, suitable for different scenarios. Highly accurate and can be used for enforcement evidence.

## INCIDENT MANAGEMENT

### Solution

### Benefits

- Incident management reduces congestion and further knock-on effects related to the original incident.
- Incident management also helps with on-site management of emergency services and other rescue teams.
- Using Active Traffic Management sub-systems including Dynamic Speed Limits, Queue Warnings, Dynamic Junction Control, Dynamic Travel Information and Dynamic Lorry Restrictions, it is possible to fully optimise traffic.

## OPERATIONAL MONITORING - AUTOMATIC INCIDENT DETECTION

### Solution

Parking Detection

Obstacle Detection

Traffic Flow Data Collection

Fire/Smoke Detection

Congestion Detection

Pedestrian Detection

### Benefits

- Time to detect an incident is less than 1 minute.
- The ATID system provides motorway coverage of the individual lanes and has the capability to immediately and accurately detect and report an incident at any location on the motorway.

## OPERATIONAL MONITORING – ALL-IN-ONE PLATFORM

### Solution

Toll Lane Management

Video Surveillance

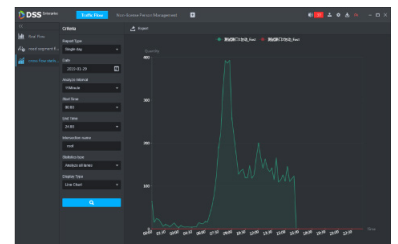

Changeable Message Signs

Auto-Incident Detection

Emergency Alarms

Traffic Data

### Benefits

- One platform integrates CCTV, ATID, Toll Lane ANPR, VMS, Emergency Alarms and Multiple Traffic Data systems.

## SOLUTION BENEFITS

### Operational Monitoring

- Reduces manpower costs
- Visible traffic management
- Quick to detect incidents

### Vehicle Management

- Collects vehicle information
- Reduces speeding vehicles

### Incident Management

- Reduces traffic congestion
- Reduces accident rates
- Reduces fatality rates
- Optimises motorist information

# SMART MOTORWAY CASE STUDIES

## THE SOLUTIONS WE PROVIDED

### In 2018

**Video**  
707

Tianjin is one of nine national central cities in Mainland China with a total population in 2016 estimated at 15 million.

**Positional Cameras**  
707

**Variable Message Signs**  
110

**Automatic Incident Detection**  
40

**Platform**  
2

**Storage**  
5

### Road

- Event Detection
- Information Release
- Traffic Flow

### Tunnel

- Event Detection
- Information Release

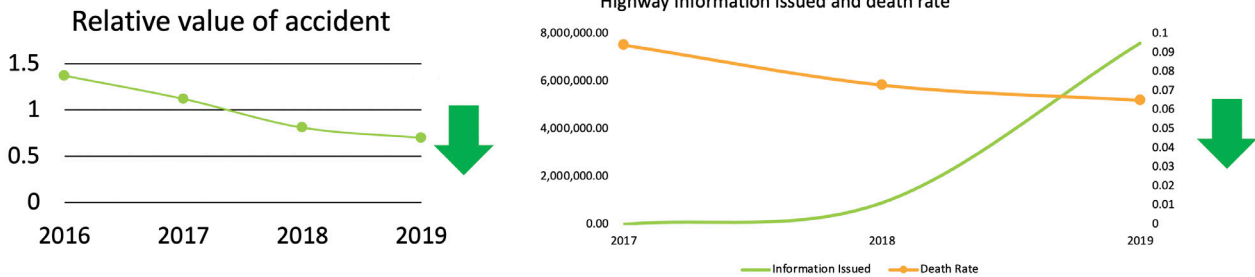

### Toll Road

- ANPR
- Emergency Alarm

## BENEFITS

Since 2016 a motorway has been using the Motorway Management System – traffic accident detection and the information release system. The overall results are a significant reduction in motorway accidents and improved levels of security.

### 2016 - 2019 Achievements

**31% Reduction in Fatalities**

**Traffic Incident Management**

- Accident prevention
- Quick response to vehicle accidents

**49% Reduction in Accidents**

**Increased Customer Satisfaction**

- Feels safer and more secure

## MOTORWAY CASES

### N-5 National Highway in Pakistan

Dahua provided the total CCTV solution including cameras, NVRs, EVS and DSS video management software. In total, there were nearly 100 Dahua HD network cameras and speed domes from the Pro Camera Series installed.

### Da-Li Expressway in China

Dahua provided the video surveillance system and ITS system. The system contains four parts, including the Toll Barriers, Tunnel, Road Side and TOC with more than 20 millions RMB invested.

### Guizhou Duyun Xingfu Tunnel CCTV & Incident Detection System

Dahua provided full-HD video surveillance equipment for real-time monitoring in the tunnel and traffic incident detection using the incident detection server.

### Fujian Highway HD CCTV Unified Platform

Dahua actively cooperated with Fujian Expressway in the development of interconnected platform standards and successfully won the bid for the Fujian Highway HD CCTV Unified Platform Project.

# RELATED PRODUCTS

## ATID PRODUCTS

### SD8A240WA-HNF

- 1/1.8" 2MP CMOS
- 40x optical zoom, EIS
- IR distance up to 500m
- Supports face recognition
- Supports Hi-PoE
- Smart Wiper, IP67
- Deep-learning-based Auto-Traffic Incident Detection

### IPC-MFW8442-Z4-D87

- 2x 1/1.8" CMOS, 8MP+4MP
- 25/30 fps@4K (3840x2160)
- 8 – 56 mm motorised lens
- 7/3 Alarm in/out, 2/1 audio in/out
- Max. IR LEDs Length 150 m
- 1000M Eth + 1000M SFP
- Micro SD memory, IP67
- Deep-learning-based Auto-Traffic Incident Detection

### PTZ85260-HNF-WA-FL

- 1/1.8" 2MP CMOS
- 60x optical zoom, EIS
- Laser distance up to 1000m
- Deep-learning-based perimeter protection
- IP67
- Deep-learning-based Auto-Traffic Incident Detection

### SDT5X225-2F-WA-0600

- Dual-PTZ system
- 1/2.8" 2Megapixel CMOS
- Powerful 25x optical zoom
- Starlight technology
- Deep-learning-based auto tracking and perimeter protection
- Supports Hi-PoE
- H.265 Encoding
- IP67

## TOLL LANE PRODUCTS

### IPMECS-2201C-IR

- 2MP, 1920 (H)×1080 (V) @30fps
- 2.7-12mm len cover up to 1 lanes
- ANPR distance: Up to 12m
- Build-in IR LEDs light
- All-in-one integrated design (ANPR, vehicle classified, traffic data collection, speed enforcement, radar intergration)
- Capture speed up to 60km/h

### DHI-ITC352-AU3F-IR8

- 3MP, 2048 (H)×1536 (V) @30fps
- 16-40mm len cover up to 1 lanes
- ANPR distance: 18 ~ 25 m
- Build-in IR LEDs light
- All-in-one integrated design (ANPR, vehicle classified, traffic data collection, speed enforcement, radar integration)
- Capture speed up to 200km/h
- Extended GPS (Optional)

## ANPR PRODUCTS FOR ROADS

### DHI-ITC952-AU3F-IR

- 12MP, 4096 (H)×2820 (V) @25fps
- 16-40mm lens covers up to 3 lanes
- ANPR distance: 18 ~ 25 m
- Build-in IR LED lights
- All-in-one integrated design (ANPR, vehicle classified, traffic data collection, speed enforcement, radar integration)
- Capture speed up to 200km/h
- Extended GPS (Optional)

### DHI-ITC431-RW1F-IR

- 4MP, 2688 (H)×1520 (V) @25fps
- 10.5-42mm Len cover up to 2 lanes
- ANPR distance: 15 ~ 30 m
- Build-in IR LED lights
- All-in-one integrated design (ANPR, vehicle classified, traffic data collection, speed enforcement, radar integration)
- Capture speed up to 120km/h

### ITARD-024MA-H

- Amount of lanes: 1-4 lanes
- Speed detection range: (5-350) km/h
- Speed measuring accuracy: (-4-0) km/h
- Detection range: 2-100 m
- Working frequency: 24.150GHz±45MHz
- IP67

## EMERGENCY ALARM PRODUCTS

### Emergency Alarm Tower

- HD CMOS camera
- Video and audio communication
- Remote monitor and broadcast
- Alarm integration
- Vandal-resistant: IP65, IK10

### Emergency Box

- SIP intercom with 720P video
- Digital noise reduction and echo suppression
- Supports alarm by pressing call button
- Supports alarm input output
- IK10, IP65

### Master Station

- SIP intercom master station
- 10" TFT capacitive touch screen, 1024×600
- Alarm integration
- Video intercom

## KEY PRODUCTS

### Traffic Incident Detector

- Adopts deep learning algorithms
- Traffic Incident Detection: Parking, pedestrian, congestion, wrong-way detection, obstacles, smoke, fire, speeding, driving too slow (for motor vehicles).
- Traffic flow detection: average speed, time occupancy rate, space occupancy rate, space headway, time headway and queue length

### Converged Communication

- SIP server
- Supports 200 call channels, 200 recording channels, 5,000 VoIP channels
- Supports digital phones: 2 x E1
- Supports analogue phones: 8 x FXS, 16 x FXO
- Supports radio intercom

### Video Management Platform

- CCTV, ATID, ASE, EAS, VMS etc, sub-system management
- Video aggregation, video docking, device docking
- Video live-view, Video playback, Alarm management

## NETWORK PRODUCTS

### Core Switch S7606

- Providing multiple high availability technologies such as non-stop forwarding, non-stop upgrade, graceful restart, and ring network protection.
- Supports 40GE and 100GE
- Supporting technologies required by cloud data centers, for example, TRILL, EVB, and FCoE

### Aggregation Switch PFS5936

- 24 x 100/1000 Mbps Base-X, 8 x 10/100/1000 Mbps Base-T, 4 x 1/10 Gbps SFP+
- Supports 24 100/1000 Mbps and 4 1/10 Gbps fibre ports, 8 10/100/1000 Mbps Ethernet ports
- Supports VLAN and port aggregation
- Supports STP, RSTP, MSTP and ERPS
- Supports Web, CLI and SNMP management

### Access Switch PFS4204

- Supports 2 x 10/100/1000 Mbps Base-T and 2 x 100/1000 Mbps Base-X
- Supports POE, VLAN and port aggregation
- Supports STP, RSTP, MSTP and ERPS
- Supports WEB, CLI and SNMP management

# SMART CAR PARKS – CHALLENGES AND REQUIREMENTS

## ELEMENTS

Airport Car Parks

Shopping Centre Car Parks

Private Car Parks

## CHALLENGES

Difficulty Finding a Space

Parking Revenue Issues

Accidents & Thefts from Vehicles

Costs too High

## REQUIREMENTS

Improve Experience

Increase Revenue

Improve Safety

Save Cost

# SOLUTION OVERVIEW

## Highly Convenient

Parking Management

PMS Pro

## High Efficiency

Available Spaces Display

Outdoor LED Screen

Intercom Card Swiping

VTO Kit

ANPR Open Barrier info. Display

AI Access ANPR Kit

High Speed Barrier

Barrier with radar

Dispense and Validate Ticket

Ticket Dispenser  
Ticket Validator

## Low Cost

Parking Space Detection

Spot Detect Camera

Vacant Space Guidance

Parking Guidance Sign

Find my Car

Car Locating Kiosk

Parking Fee Payment

Auto Payment Machine

Car Park Surveillance

Surveillance Camera

# SOLUTION INTRODUCTION

## ENTRANCE

### Scenario

At Entrance

Entrance Process

Get Ticket

Entry Problems

### Solution

#### Outdoor LED Screen

##### Available Spaces Displayed

Software works out the available number of spaces and displays this number on an external screen.

#### Ticket Dispenser

##### Self-service with Ticket Dispenser

Ticket dispensed by machine.

#### Barrier

##### High-speed Barrier with Radar

Anti-fall feature enabled using radar.

#### VTO Kit

##### Call to Administration Centre using VTO

For any entry problems or when visitors arrive, the driver can call the administration centre using the VTO.

#### AI Access ANPR Kit

##### ANPR & Flexible Access Control

Vehicle access is controlled by ANPR cameras, without the need for any tickets. Supports black and white list access authorisation.

### Benefit

Save up to 75% on entry & exit times using ANPR cameras.

## CAR PARKING

### Scenario

### Benefit

Reduces time to park by 44% by using VPGS based on AI.

### Solution

#### Parking Guidance Sign

##### Vacant space guidance

Indoor screen shows the numbers of available parking spaces in every direction.

#### Spot Detection Cameras

##### Parking space indication

Spot cameras can automatically identify the current status of a parking space and provide the car number plate information to the management centre.

#### Spot Detection Cameras

##### Parking contravention warning

When a parking contravention occurs a warning/alert will happen.

##### Real-time monitoring

Provides a real-time video stream to the administration centre for monitoring and evidential purposes.

## LOCATING CAR & EXIT

### Scenario

### Benefit

52% of drivers forget where they have parked and FMC solves this problem perfectly.

### Solution

#### Car Locating Kiosk

##### Help to find your car quickly

Input Number Plate

Show the best route

#### Parking Fee Payment

##### Auto Payment

With an automatic payment machine, the driver can scan the ticket or input the vehicle number plate to easily pay.

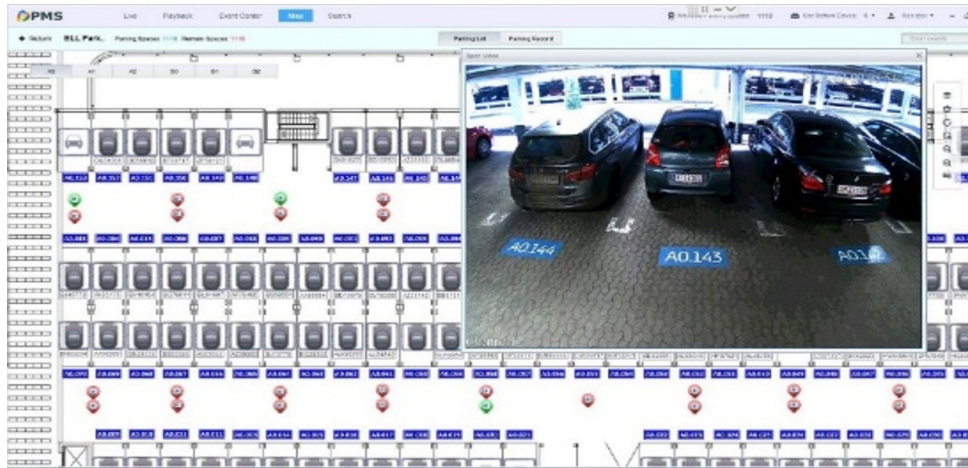

#### AI Access ANPR Kit & Ticket Validator

**ANPR & Self-service with ticket validator**  
With ANPR cameras there's no stopping as you exit.

# PARKING MANAGEMENT

## Solution

### Unified PMS with Full E-map Control

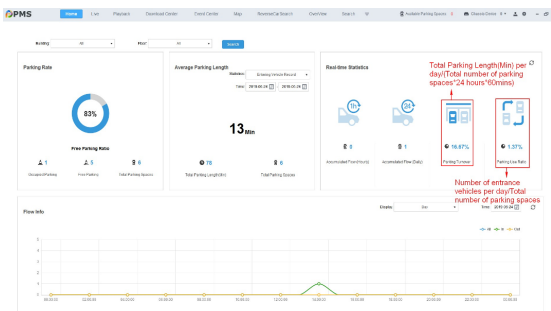

## Benefit

- 90% reduction in operational costs based on an unmanned operation – one car park, one operator.
- 70% reduction in vehicle emissions due to less time needed to find vacant spaces.
- 80% reduction in overall costs.

# BI ANALYSIS

## Solution

### Parking Rate Statistics

- Occupied parking spaces
- Total parking spaces
- Rate

### Real-time Statistics

- Accumulated vehicle flow within 1 hour or 1 day
- Car park space turnover
- Car park occupancy rate

### Average Parking Length

- Two statistical methods
- Total duration of parking
- Total parking spaces

### Entrance & Exit Information

## Benefit

More ways to increase revenue using BI

Differentiated Pricing

VIP Services Provided

Parking Coupons

# SOLUTION BENEFITS

## Increased Usage

- Entry without needing to stop
- Reduces access time from 16s to 4s
- Half of drivers benefit from locating their cars more easily

## Much Safer

- Easy to find related video evidence after an incident

## Increased Revenues

- Unoccupied rate decreases
- 44% of time saved parking and exiting car park
- Premium prices help operators increase revenue

## Decreased Costs

- At least one member of staff is needed in every car park
- Most car parks are unmanned

## RELATED PRODUCTS

### ANPR Cameras: ITC215 Serials

- 2Megapixel
- WDR, Day/Night(ICR), 3DNR,BLC, HLC H.265 & H.265
- IP67
- ANPR
- Vehicle data structuring

### Access ANPR kit: DH-IPMECS-2201C serials

- 2 Megapixel
- High vehicle capture rate:  $\geq 99\%$
- Vehicle data structuring
- Embedded White List
- IP54

### DHI-IPMECD-3011 Serials Barriers with Radar

- Anti-fall using connected radar, coil or IR sensor
- Supports remote control with a 50m distance
- Operating temperature:  $-40^{\circ}\text{C}$  to  $+70^{\circ}\text{C}$
- Operating voltage: 220V AC $\pm 15\%$
- Protection grade: IP55

### Indoor LED Sign: DHI-IPMPG1 serials

- DHI-IPMPGI-110AC: One way
- DHI-IPMPGI-120AC: Two way
- DHI-IPMPGI-130AC: Three way

**Parking detection: ITC214 serials**

- 2MP
- Simultaneously detects up to 2 spaces
- Indicator supports at least 7 colours
- Supports WDR
- Supports PoE (Power via Ethernet)

**Parking detection: ITC314 serials**

- 3 MP
- Dual-Lens design, simultaneously detects up to 6 spaces
- Indicator supports at least 7 colours
- Supports WDR
- Supports PoE (Power via Ethernet)

**Outdoor Totem LED Sign**

- DHI-IPMPGI-211AA (Single layer)
- DHI-IPMPGI-221AB (Double Layer)
- DHI-IPMPGI-231AB (Three Layer)
- DHI-IPMPGI-241AB (Four layer)
- DHI-IPMPGI-251AB (Five Layer)
- DHI-IPMPGI-261AB (Six Layer)

**Car locator | DHI-IPMPGS-221A**

- Supports locating vehicle using number plate
- 1x 1000Mb Ethernet port and 2x USB ports
- 21.5-inch touchscreen

**PMS Pro**

- Supports 200 online users
- Supports 10 Entrance/Exit ANPR channel inputs
- Devices supported: NVR, IPC, VTO, EVS, Access ANPR, Spot Detector, Car Locator, Barrier, LED Screen, IVS-T, Car Locator, etc.
- Platform SDK available for third-party device integration

# SMART PARKING CASE STUDIES

## AIRPORT IN SCANDINAVIA

In 2018 - 2019

One of the top ten airports in Europe and one of the biggest in Scandinavia. About 30 million passengers in 2018. A total of 6,500 indoor parking spaces.

Spot Detectors

1,000+

Guidance Screens

85

Car Locator

Platform

2

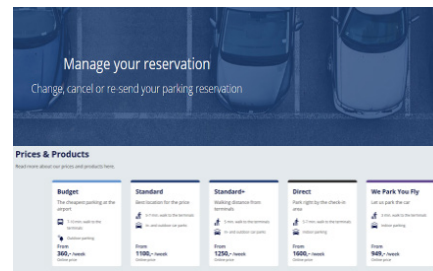

Storage

4

### Parking Area

- Parking space detection
- Vacant space navigation

### Parking Operation

- BI provides parking data for operational decisions.

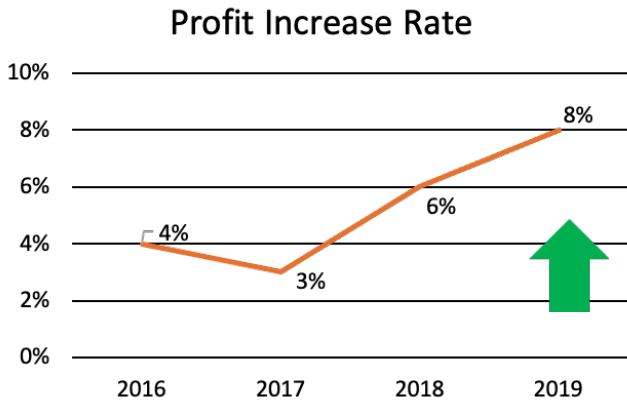

### Pedestrian Entrances

- Helps drivers to locate their vehicles.

Dahua provided a parking solution for the airport for all of their car parking spaces between 2018 and 2019, which significantly improved the parking experience for users and increased parking revenues.

### Solution

31%  
Saving on  
Labour

52%  
of Drivers  
Helped Finding  
Vehicle

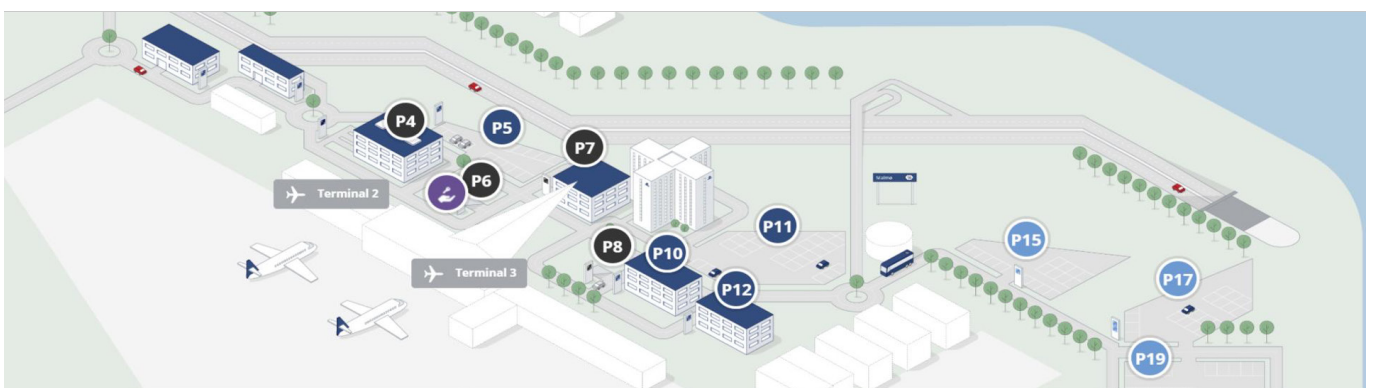

44%  
Saved Time  
Parking

## COPENHAGEN AIRPORT

- The biggest airport in Scandinavia
- One of the oldest international airports in Europe
- One of the top ten airports in Europe
- 30 million passengers in 2018
- A total of 6,000 indoor parking spaces

### Benefits

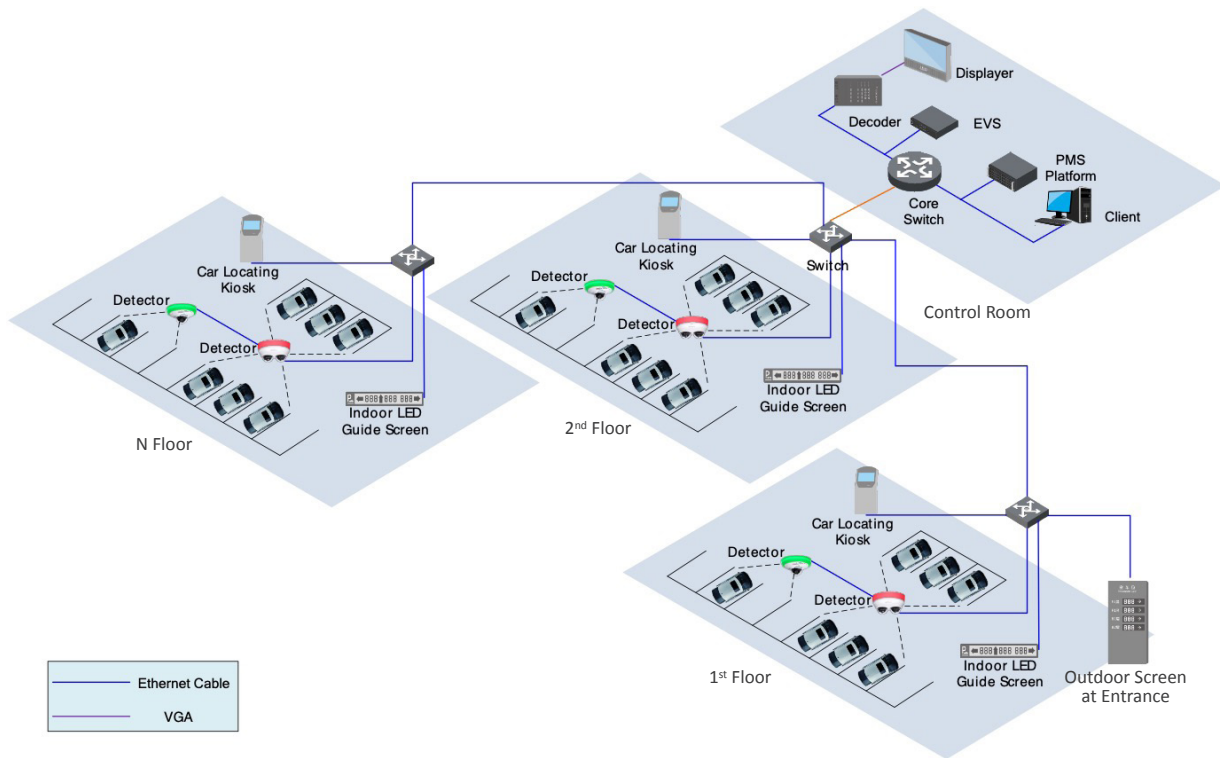

P Budget 
 P Standard 
 P Standard + 
 P Direct 
 P We Park You Fly 
 P Campaign offer

**Improved Experience:** 2 level navigation of VPGS and FMCS using ANPR to significantly improve the parking experience.

**Increased Revenue:** The car park operator can use vehicle parking information based on BI to setup a premium price policy to create more revenue.

**Enhanced Safety:** Each detector can provide video surveillance services to customers, which will provide evidence in the event of an incident and will deter criminals.

**Low cost:** Unmanned operations using AI and ANPR reduces labour and operational costs by 70%.

### High Accuracy

The camera has multiple built-in AI algorithms to provide a highly accurate way to detect whether a space is free or not. ANPR and being able to identify parking contraventions are also available using video analysis technology.

### High Reliability

The platform supports hot standby and supports deployment in a virtualised environment. Low equipment failure rate and easy to maintain.

### Total Solution

Provides a complete solution for customers, including VPGS, FMCS, Parking Management, BI analysis, video storage, control display and more.

Helps find empty parking spaces quickly using LED Signage and Spot Detection Camera, the camera supports ANPR and the detection of available parking spaces using the built-in AI algorithm.

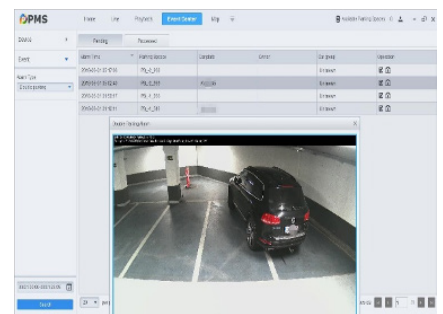

Improves the driver experience, reduces vehicle emissions and reduces costs.

The FMC system uses ANPR technology to help drivers locate their vehicle and shows a simple route to follow in order to find it.

Enhanced user experience by helping drivers to find their cars more easily.

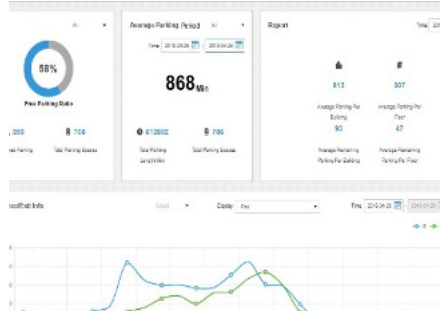

The cameras built-in AI algorithm also detects parking contraventions, for example straddling two bays.

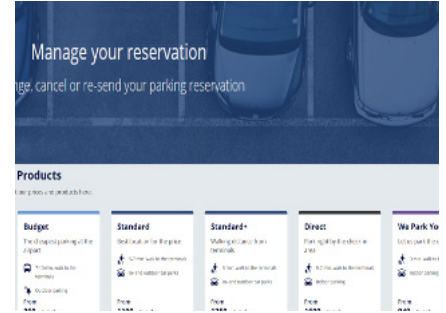

Detects vehicles straddling two bays, unauthorised parking, improves parking space occupancy and reduces car park operator revenue losses.

Each detector can provide video surveillance for customers.

Analyse parking patterns: average parking times, vacancy rates, most popular parking floor, etc.

Sends vehicle ID and location data to payment system, which can set a premium and conditional pricing policy for different parking spaces.

Provides evidence of an incident and deters criminal activity.

Gives operators more insight into the behaviour of people using the car park. Provides data to help with decisions regarding future parking spaces.

The car park operator can use vehicle parking information to set up a premium price policy, creating more revenue.

## OTHER CASES

### Denmark Billund Airport

Billund airport is the second largest airport in Denmark. The headquarters of LEGO is located in this city. The car park has around 1,217 parking spaces.

Dahua installed VPGS & FMCS for the car park operator. Dahua's solution helps users quickly find vacant parking spaces. Meanwhile, video monitoring and a reverse search function are also provided.

### Czech Novy Smichov Shopping Centre

Novy Smichov is a large shopping centre owned by the French Klepierre group. It is one of the most prestigious shopping centres in Prague with a total of 2,240 parking spaces.

Dahua installed VPGS & FMCS for the customer. This has improved the parking experience for customers and has helped the shopping centre attract more customers.

### Turkey Ispark Parking

Ispark is the biggest parking operator in Istanbul. The car park has over 1,000 parking spaces.

Dahua provided over 600 detection devices and a complete parking solution, helping to improve the experience for customers.

### Netherland Jaarbeurs Utrecht Exhibition Centre

Jaarbeurs Exhibition Centre is one of the most important exhibition centres in The Netherlands. Previously visitors complained about not being able to find a vacant parking space, but with Dahua's parking solution the whole experience has been significantly improved.

# SMART BUSES – CHALLENGES AND REQUIREMENTS

## ELEMENTS

Inside of the Bus

Driving Along a Street

Getting on or off a Bus

## CHALLENGES

On-board Safety Threats

High Bus Accident Rate

Complaints due to Bad Experiences

## REQUIREMENTS

Operational Monitoring

Vehicle Management

Incident Management

# SOLUTION OVERVIEW

# SOLUTION INTRODUCTION

## PASSENGER SAFETY

### Scenarios

**Epidemic Prevention**

**Theft on the Bus**

**Items left on the Bus**

### Benefits

- Automatic and non-contact method of measuring the body temperature of passengers, reducing the risk of cross-infection.
- Helps passengers to retrieve lost luggage by searching the HD video footage.

### Solution

#### Body Temperature Monitoring Terminal

##### Non-contact body-temp monitoring

The device can monitor the body temperature in a very efficient way and remind passenger to wear a mask. If someone's body temperature is abnormally high, the device generates an alarm to inform the driver to take preventative action.

#### MNVR

##### Data transfer and abnormal alarm

1. Obtain the passenger's body temperature and send to the platform to generate a statistic with face snapshot and body temperature.
2. The abnormal temperature alarm is immediately sent to the control centre.

#### Dual Lens Camera

##### No blind-spots

Dual lens camera and other internal cameras cover the entire bus to provide high-definition recordings without any blind-spots.

#### Panic Button

##### Emergency alarm upload

Panic button allows driver to send alarm to control room in real-time.

## DRIVER SAFETY

### Scenarios

**Unusual Driver Behaviour**

**Dangerous Driver Behaviour**

**Bus Turning**

### Benefits

- Bus accidents (collisions with pedestrians) are reduced significantly due to warnings from active safety solution.

### Solution

#### DSM Camera

##### Driver status monitor

DSM camera can detect unusual driver behaviour such as fatigue, closed eyes, smoking and using mobile phone while driving.

#### ADAS Camera

##### Advanced driving assistance system

ADAS camera can detect and alert against dangerous driving such as forward collision warnings, headway monitor warnings and lane departure warnings.

#### BSD Camera

##### Blind spot detection camera

BSD cameras can detect if a pedestrian or motorcycle is in the driver's blind spot when the bus turns.

#### AI MNVR

##### All in one AI MNVR

AI MNVR supports all of the above intelligent functions with a deep learning algorithm that triggers alarms to remind driver to focus on driving.

## PASSENGER EXPERIENCE

### Scenarios

**Passenger Counting**

**Bus Lane-only Occupation**

**Passenger Guidance**

### Benefits

- Reduces passenger waiting time by optimising bus route.
- Reduces bus travel time as bus-only lane is free.
- Improves journey experience with arrival information notifications.
- Improves revenue by displaying on-board advertisements.

### Solution

#### People Counting Camera

##### Count passengers getting on a bus

Passengers getting on the bus at each station are recorded and his generates data which helps bus operators to optimise the bus schedule to reduce passenger waiting time. The camera limits the flow of people getting on the bus, further preventing the spread of the virus.

#### ANPR Camera

##### Capture the car occupying the bus lane

When a private vehicle drives in a bus lane the camera will capture and recognise the number plate of the car automatically, which helps keep lane free for buses.

#### LED Screen

##### Arrival information display

1. LED screen shows the bus stopping information and will display the next bus stop name when the bus approaches it.
2. Displays advertisement to increase revenue.

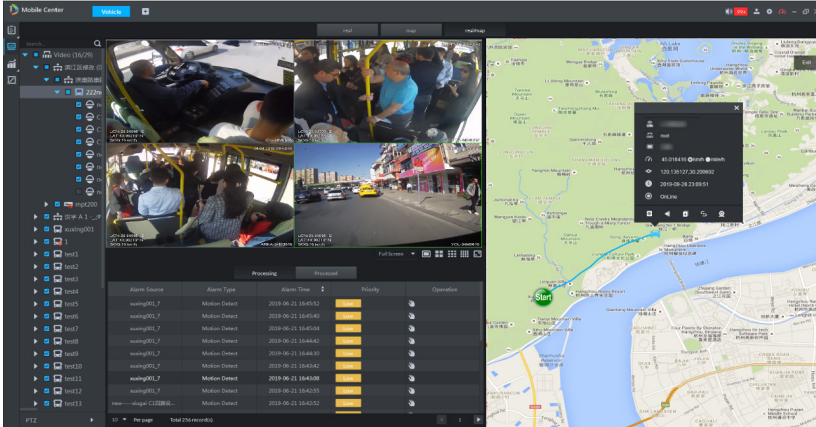

#### MNVR

##### Information transfer and linkage

1. Transfers the people counting data to platform
2. Supports bus lane recognition and ANPR
3. Displays bus stop name and links this with bus stop coordinates.

## PLATFORM - FLEET MANAGEMENT

### Solution

### Benefits

- All-in one and easy to manage map shows the operational status of all buses
- Quick response dealing with alarm notifications
- Fast intervention for unusual driving behaviour, helping avoid potential accidents

## PLATFORM - DATA ANALYSIS

### Solution

### Passenger Counting Statistics

- Passenger flow at bus stops
- Passenger flow of different bus routes
- Passenger flow forecasting

### Safe Driving Statistics

- Safe driving ranking
- Driving violation statistics
- Intelligent alarm statistics

### Benefits

- Optimise bus intervals based on passenger counting statistics to reduce passenger waiting time and increase revenue
- Regulate driver behaviour based on safe driving statistics to improve safety and reduce costs as a result of an accident/incident

## SOLUTION BENEFITS

### Much Safer

- Supports body temperature monitoring and flow limits to protect passengers
- Supports alerts to monitor driver behaviour to reduce accident rates

### Fewer Costs/Increased Revenue

- Reduce losses due to fewer accidents
- Revenue increases by better bus route optimisation and on-board advertisements

### Better Experience

- Reduced journey times with no unauthorised vehicles in the bus lane
- Reduced waiting at peak times

# CASE STUDIES

## Background

- The widest coverage of transportation in Turkey is by public bus
- Total of 1.5 billion ticketed passengers in 2019

**EVS**

**Mobile Centre Platform**

**Client**

**Core Switch**

**MNVR**

**MNVR**  
7,500

**Camera**  
30,000

**Panic Button**  
7,500

**Platform**  
23

## Benefits

In February 2017 Dahua, together with a local security installer in Istanbul, delivered a project by installing HD cameras and mobile video recorders in each bus. With Dahua's mobile solution it helped the bus operator solve many problems.

- Help passengers to retrieve lost baggage
- Help determine who was at fault regarding bus accidents
- Help to resolve disputes between drivers and passengers

Helped  
retrieve lost  
baggage:  
**36**  
cases

Helped  
determine  
liability:  
**70**  
cases

Helped  
resolve  
disputes:  
**6**  
cases
